Thank you for your interest in the Bi-lateral Scholars Program! Its primary mission is to promote a one-to-one investment in the lives of Kenyan children at Facing the Future School. Specifically, an individual/family chooses to make a financial AND emotional investment in a rising 7th or 8th grade student's education. This commitment is hands-on and anticipates ongoing, two-way communication. By entering into this relationship, you will be joining a Support Team set up for each student in Kibera. Why is it named the Bi-lateral Scholars Program? Quite simply, we imagine both parties will be significantly impacted. For the young Kenyan, the primary value of the program is an opportunity to be in school and work towards a better future. The value for an investor is perhaps less obvious, but no less impactful – an opportunity to connect with a child across the planet, to learn about realities that had beforehand been unknown, and a chance to expand hope in the lives of everyone involved.
